

COURONNES DE L'AVEVENT

Bonjour Véronique, voici plusieurs idées pour confectionner des couronnes de l'avevent de façon écologique et zéro déchet. Ce sont les idées de Géraldine, Marie-Lou et moi, j'espère que ça te plaira !

A decorative arrangement of cork stoppers, greenery, and candles. The scene features numerous cylindrical cork stoppers of varying heights and textures, some with dark spots. Interspersed among them are sprigs of green pine needles and clusters of small, bright red berries. In the background, several white candles are visible, some held in gold-colored, tree-shaped holders. The overall composition is festive and rustic, set against a plain, light-colored background.

flotté*

Les rouleaux de papier toilette

Les fleurs du jardin ou d'ailleurs

*Les pommes
de pain*

A decorative wreath made of dried leaves, pinecones, and white ornaments on a wooden background. The wreath is composed of various natural elements including brown and tan leaves, several pinecones, and white spherical ornaments. It is set against a light-colored wooden plank background. The text 'Les feuilles mortes' is overlaid in a white, cursive font on the left side of the wreath.

Les feuilles mortes

La pâte à sel

The image shows two decorative wreaths made of wood, twigs, and macramé. The wreaths are adorned with green succulents, white macramé flowers, and red starburst ornaments. A large green ribbon is tied around the top of the right wreath. The text "Bois, ficelle ou macramé" is written in a white, cursive font across the center of the image, with a white horizontal line underneath it.
